What will SAPOLE do. Why it will clean paint, make oil-cloths bright, and give the flows, tables and shelves a new appearance. It will take the grease off the dishes and off the pots and pans. You can scour the knives and forks with it, and make the first things shine brightly. The wash-basin, the bath-tub, even the greasy kitchen sink will be as clean as a new pin if you use SAPOLIO. One cake will prove all we say. Be a elever housekeeper and try it. THERE IS BUT ONE SAPOLIO, ELVARE OF IMITATIONS.

shown every evidence of advancing, and in fact have advanced materially over prices of ten days ago. A better class of beeves is being run to market now, every shipment, in the natural run of things, contains a being the contains a being run to market now. the hattar run of things, contains a set-ter grade than former ones, and as a conse-quence, prices are more satisfactory to the shipper. Shippers are learning, too, that those cattle from Texas that have topped both the St. Louis and Chicago markets recently were of superior quality to 'the ordinary run of choice beef cattle, and are convinced, by experience, too, that they are on the wrong trail if they expect such figures. Advices from foreign markets now are to the effect that the over supply of half fat cattle is rapidly diminishing, and the telegraphic dispatches daily now read: "Market strong, prices steady to firm for good stuff." That there was undue excitement over the market of a few weeks ago, when prices were out to sight is apparent, a caused a rush of thin, half fat, alleged beeves to market, and the depression in beeves to market, and the depression in prices from this cause could not be avoided.

A Macon county, Ill., man says fat cattle are scarce and butchers have to grease their saws to cut up cow beef.

'uesday's receipts of cattle at Chicago are estimated 1500 smaller than the corn sponding day last year, but the number Texas—3500—is the same as a year ago.

is said, will be held over for next year's market.

Not in the past ten years has the Southwest been favored with such general rains as has failen this season, says the Stock Grower and Farmer, and in consequence there is a very cheerful feeling all along the line. A review of the situation shows that there is not one unfavorable feature, and the owner of the old cow has struck the turn in the long lane of adversity and is now hitting the highway of prosperity on the elevated points.

The Stockman and Farmer says that the items floating around through the press to the effect that the losses of cattle in Rio the effect that the losses of cattle in Rio Arriba county and other sections of Northwest New Mexico during the past winter were 50 per cent and over are inisleading, as indicating a heavy loss through the territory. In the section mentioned there are but few cattle, and a 50 per cent loss there would cut but a small figure in estimating the total loss in the territory, which was very light, being much below the average.

Canada Coming to It.

A dispatch from Toronto announces that the Canadian privy council has decided to remove the embargo on American cattle. The statement is made that a dressed beef syndicate at Three Rivers wants to draw heavily on American cattle, and that is one of the chief reasons for letting down the bars. Heretofore Canada has taken no part in the dressed meat business, but in the future she will doubtless see the necessity and advantage of working up the sys-tem on a large scale. This new move will create another field for American cattle. though of course the beef will come into competition with that forwarded by American companies to Great Britain.—[Chicago Drovers Journal.
